What is Intentional Peer Support?

Intentional Peer Support (IPS) is a powerful framework for thinking about and creating mutual relationships, and is used across the world in settings ranging from peer-run programs to community managed organisations to traditional mental health services. About IPS Core Training

IPS Core Training is the foundation training to this innovative approach and will have you practicing right away. In a highly interactive environment, participants learn the tasks and principles of IPS, examine assumptions about who we are, and explore ways to create relationships in which power is negotiated, co-learning is possible and support goes beyond traditional notions of 'service'. IPS is about opening up new ways of seeing, thinking and doing and here we examine how to make this possible.
